

Asset Lifecycle Management

Improving IT, Through Tailored Asset Management Services

PDS helps customers across the country manage the most complex technology initiatives end-to-end, including fulfillment, deployment, support, management, and retirement of their most critical devices. Our customers benefit from integrated solutions that streamline and simplify asset management, all while allowing your team to focus on strategic improvements and enhancements.

Fulfillment

PDS offers a wide range of fulfillment services that can be individually tailored for your business. From asset tagging, custom reporting, imaging, and managed delivery, PDS will streamline your IT business process and allow your internal team to focus on more strategic tasks.

PDS offers highly customizable web-based sourcing solutions to help reduce order processing costs, decrease time-to-fulfillment, and improve order accuracy. Customers can take advantage of PDS Asset View, which is a simple to use management tool for accessing purchase history, tracking device lifecycle, and viewing warranty status.

Integrated Configuration services like our Virtual Site Staging imaging process allows your devices to arrive end-user ready, with your OS and applications configured for your network using your preferred systems management tool.

Our patented Rack N Roll packaging and deployment system creates a seamless delivery and installation process, eliminates packaging waste, and improves the quality of service provided to the business.

Deployment

Whether it's a large-scale project or just a small refresh, let PDS take your delivery to the next level with our deployment services. Our systematized tools and processes allow for effective and efficient deployments, while allowing each end user to feel like they received special treatment.

Our integrated tools allow for individual tracking of assets from procurement to deployment, accurate location tracking of individual assets, and secure supply chain management for assets to be retired.

Management

PDS offers consulting and implementation services for Microsoft SCCM and LANDESK Management Suite. We help optimize systems management tools to provide pertinent asset information required to support an effective roll-out as well as implementation of streamlined image and application deployment methodologies to ensure each device is configured to exact user requirements.

Support

PDS has a team of experienced resources who have a deep knowledge of device technologies in all business areas. Our specialized support solutions reduce downtime by creating an effective strategy to handle device tracking and maintenance. PDS can customize depot repair services as well as provide on-site support options for your warranty and out-of-warranty repair needs. Customized sparing solutions leverage our fulfillment capabilities to have the right device on standby in the event of an issue.

Retirement

PDS offers secure and integrated asset disposition programs that help you maximize value recovery. Our retirement services help reduce IT "waste" and eliminate the need for on-site storage. We also provide a secure chain of custody in order to minimize security and regulatory risks.
