

## WHAT IS THE TC52x-HC MOBILE COMPUTER?

The ultimate feature set for the ultimate quality of care.

As the third generation of the highly successful TC5X-HC family, the TC52x-HC provides healthcare workers with powerful new features that improve patient outcomes by improving workflows and task accuracy. Built with medical grade plastics and designed to thrive in healthcare environments, the TC52x-HC gives clinicians the ability to easily, connect, collaborate and coordinate care. With key enhancements like a hot swappable battery, best-in-class processor, new scan engine, full HD display and enhanced camera, the TC52x-HC represents the most advanced purpose-built enterprise solution for healthcare.

## WHY SHOULD YOU BUY THE TC52x-HC?

### TOP 5 CUSTOMER BENEFITS

1

#### Trust your mission-critical operations to a specialist.

Unlike general purpose devices, every aspect of TC52x-HC has been purpose-built for clinician workflows. Its healthcare-friendly white illumination LEDs and green aimer are safe to use throughout the hospital. Advanced medical grade plastics are specifically designed to enable the constant cleaning and disinfecting required to prevent the spread of healthcare associated infections (HAIs). A dedicated emergency red alert button improves patient and clinician safety. And more.

2

#### Give your clinical staff a force multiplier.

Simply put, the TC52x-HC is the most advanced purpose-built enterprise solution for healthcare. The best-in-class processor provides plenty of power to run all your EHR apps. Its full HD display offers better detail for viewing patient records and the touchscreen works with latex gloves. You can turn the TC52x-HC into a cordless PBX handset, as well as support secure text messaging that meets HIPAA requirements. And you have all the features you need to support telehealth applications.

3

#### Ready to work around the clock.

Your healthcare operations never rest — and neither does the TC52x-HC. A best-in-class battery delivers 14 hours of power, more than enough for the longest shift. True hot swap support means that clinicians can easily change the battery without powering down the device, closing apps or putting it in suspend mode — maximizing uptime in an environment when every second counts. And with disinfectant-ready plastics and single sign-on support, the TC52x-HC is perfect for sharing shift after shift.

4

#### Say good-bye to problematic barcodes.

Challenging barcodes can cause clinicians to perform manual workarounds — which lower productivity and increase the chance of errors. That's why the TC52x-HC is equipped with Zebra's advanced SE4720 scan engine and PRZM Intelligent Imaging. You can count on the lightning fast capture of barcodes in virtually any condition, even on curved or uneven surfaces like medication vials and IV bags. Built-in tools make it easy to capture Unique Device Identifier (UDI) codes and data on blood bags — a single scan captures it all!

5

#### Get more value with Mobility DNA.

Zebra Mobility DNA provides powerful tools that no competitive product can offer — features that improve productivity, simplify management and enable faster app integration. For example, easily stage devices with StageNow, find misplaced devices with Device Tracker and give staff the best possible WiFi connections with WorryFree WiFi. LifeGuard™ for Android™ provides security patches for up to eight years and devices can be updated over the air with a supported EMM.

### END USERS

- Nurses
- Doctors
- Clinical support staff
- Therapists
- Lab/Pharmacy technicians
- Phlebotomists
- Nutritionists
- Patient transport
- Medical assistants

### APPLICATIONS

- PBX calls and push-to-talk (PTT)
- Secure text messaging
- Mobile alarms and alerts
- Medication administration
- Prescription tracking
- Blood transfusion administration
- Electronic patient record access
- Breast milk management
- Inventory management

### ROI

- Faster and easier entry of patient information
- Improved staff productivity
- Better quality of care
- Increased task accuracy
- Maximum return on investment
